### (54) RACK LABELING DEVICE

#### (57)Abstract:

**PURPOSE:** To provide a rack labeling device capable of setting an indication content of each rack label quickly and accurately and being easy to handle, by enabling the device to integrally handle rack label and article rack and to indicate indication positions and contents in each rack label as well as set them therein.

**CONSTITUTION:** Rack labels 10, an indication position setting input means 35P, an indication content setting input means 35I, and position-classified content output control means 31, 32 are installed to the device. And, each rack label 10 is configured so that multiple indication positions and indication contents can be set therein and each indication content can be indicated. Accordingly, the indication contents in each rack label 10 can be set quickly and accurately by forming each rack label 10 to be as wide as the width of the article rack, and to be fixedly fittable to each article rack.
